

# WIDE-OUT™

## TAKE TOTAL CONTROL OF YOUR WINGS.

The WESTERN® WIDE-OUT™ adjustable wing snowplow puts total control in your hands for unmatched versatility. Go from retracted straight to extended straight, windrow, and scoop, all at the touch of a button. Get done up to 30% faster. The WIDE-OUT is the ultimate in CONTRACTOR GRADE® performance.

**ANGLES IN SCOOP**  
The WIDE-OUT™ blade fully angles in scoop position to carry snow around corners with minimal spill-off.

### WING CUTTING EDGES

Durable polyurethane wing cutting edges reduce wear and protect the blade. These cutting edges can effectively "trip" in any position, including scoop.

### HYDRAULIC WING EXTENSIONS

Independently position each wing to maximize blade width and move more snow. Wings slide laterally across a structurally reinforced slide box.

### DUAL POWER BAR

Six vertical ribs and dual horizontal POWER BAR design provide exceptional strength and prevent blade twisting, even in the most demanding snow conditions.

### TRIP SPRINGS

Four trip return springs help protect your plow and truck by allowing the blade to trip forward when striking an obstacle.

## WESTERN® WIDE-OUT is four plows in one

- 8' Retracted Straight
- 10' Expanded Straight
- Windrow Position
- 8' 10" Scoop Mode

### UltraMount® 2

Fast, easy and fully mechanical mounting system for hassle-free hookup.

### FLEET FLEX

Electrical system provides true fleet interchangeability.

### SECURITY GUARD™

Anti-theft system renders plow inoperable to unauthorized users.

### OPTIONAL ACCESSORIES

- Snow deflector
- Shoe kit
- Back drag edge
- Emergency parts kit
