

Tornado LT™

BIG JOBS COME IN SMALL PACKAGES

Designed to fit in the bed of a UTV or pickup truck, the WESTERN® Tornado LT™ 0.5 cubic yard poly hopper spreader is ready when a customer calls. The Tornado LT spreader has a 3" diameter auger feed system and a 2" steel spinner for spreading all types of de-icing materials. Top spreader performance in a sturdy, compact package to get your job done right.

Tornado LT™

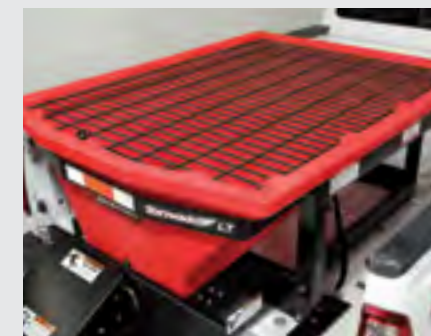

DUAL ELECTRIC MOTORS

Two instant-start, 12-volt electric motors provide independent control over the auger and spinner mechanisms. The spinner motor is sealed inside a weather-resistant housing, protecting it from corrosion.

VIBRATING INVERTED V

A standard 12-volt vibrator is directly connected to the inverted V, providing maximum agitation to help break up clumps and ensure the smooth flow of material.

STANDARD TOP SCREEN

Helps break up large chunks of de-icing material during loading to help prevent clogging and bridging during operation.

ONE-PIECE POLY HOPPER

This one-piece poly hopper body is supported by a power-coated steel frame for structural integrity and low-maintenance life-long performance.

FITTED TARP COVER

A standard fitted tarp cover helps ice control material stay dry to prevent clumping.

OPTIONAL ACCESSORIES

- Hold Down Kit
- Material Control Tube
- Optimum Flow Kit

TRANSVERSE AUGER DELIVERY SYSTEM

Automatically backs itself in and out until an obstruction is cleared or a required adjustment has been made.

BOLT DOWN BED MOUNT

A positive-lock, bolt-down bed mount provides secure installation.

VARIABLE SPEED CONTROL

The dual variable-speed control provides independent control over rate of delivery and spread pattern for optimal ice control coverage with minimum waste.

More jobs. Done faster. | westernplows.com
